On-Call Engineering Services RFQ

Questions and Responses received to date, January 24, 2024

(Reminder: Final Questions Deadline: Wednesday, February 7, 2024, 5:00 pm; a second batch of Questions/Responses will be provided by Friday, February 9, 2024)

1. For this proposal, do we need to show subconsultants for support roles in each category we are pursuing? Or shall we simply indicate that a subconsultant will be used for those roles?

PCIDs Response: There is no need to list subconsultants in the submittal for this RFQ. Selected firms will be expected to self-perform the majority of work assignments on a task order, and thus Qualifications will be evaluated for the primary consultant submitting for an on-call engineering services contract. During specific task order assignments, proposed subconsultants for tasks such as Survey, SUE, geotechnical services, etc. will be considered and accepted at that time.

2. Are the PCIDs selecting one firm to do all of their project management under category E?

PCIDs Response: Each of the service categories A through F may have one or more consultants selected for on-call contracts.
